BACKGROUND

DNA (deoxyribonucleic acid) exists, most commonly, as two intercoiled double strands (known as a double helix) that are supported by a sugar backbone and are linked via hydrogen bonds between the four bases (guanine, cytosine, adenine and thymine). Molecules (ligands) can interact with DNA via electrostatically binding, covalently binding or intercalating which occurs when ligands insert themselves within the double helix, specifically between the bonded base pairs. Intercalated DNA generally contains aromatic, planar ligands, such as ethidium bromide, proflavine, daunomycin or doxorubicin, whose presence prevents base pair bonding, distorts DNA structure and, ultimately, inhibits DNA replication. DNA intercalators are often used in the treatment of rapidly growing cancer cells, such as those in Hodgkin’s lymphoma, as they effectively prevent cell replication and thus, slow cancer growth.

REFERENCES

RESEARCH USE

For research use only, not for use in diagnostic procedures.

SOURCE

Intercalated DNA (1.BB.24) is a mouse monoclonal antibody raised against ethidium bromide intercalated calf thymus DNA.

PRODUCT

Each vial contains 100 µg IgG2b in 1.0 ml PBS with < 0.1% sodium azide and 0.1% gelatin.

APPLICATIONS

Intercalated DNA (1.BB.24) is recommended for detection of intercalated DNA by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000); non cross-reactive with single or double-stranded DNA or with ethidium bromide.

RECOMMENDED SECONDARY REAGENTS

To ensure optimal results, the following support (secondary) reagents are recommended: 1) Western Blotting: use goat anti-mouse IgG-HRP: sc-2005 (dilution range: 1:2000-1:32,000) or Cruz Marker™ compatible goat anti-mouse IgG-HRP: sc-2031 (dilution range: 1:2000-1:5000), Cruz Marker™ Molecular Weight Standards: sc-2035, TBS Blotto A Blocking Reagent: sc-2333 and Western Blotting Luminol Reagent: sc-2048.

STORAGE

Store at 4° C, **DO NOT FREEZE**. Stable for one year from the date of shipment. Non-hazardous. No MSDS required.

PROTOCOLS

See our web site at www.scbt.com or our catalog for detailed protocols and support products.
